Visual Estimates

Density

These are density plots of the 10 worst performing parameters in terms of n_{eff} .

Histogram

These are histogram plots the 10 worst performing parameters in terms of n_{eff} .

Interval

These are interval plots of the 10 worst performing parameters in terms of n_{eff} . The plots are split by parameter groups. The entire group is printed if one of the parameters is included in the worst performing parameters. The point represents median value, the inner edge the 50% CI and the outer the 95% CI.

Areas

These are areas plots of the 10 worst performing parameters in terms of n_{eff} . The plots are split by parameter groups. The entire group is printed if one of the parameters is included in the worst performing parameters. The point represents median value, the inner edge the 50% CI and the outer the 95% CI.
